Legal Service Suite

based on ServiceNow

The Legal Service Suite is an adaptive, modular solution for legal departments designed as a plug-in to the ServiceNow platform. We have evaluated legal activities and their common upstream and downstream processes to set your legal department on the path to business alignment. As a result of a fluid workflow and fewer distractions, especially less ping-pong communication, legal counsel can focus on high-risk, high-value work and be more proactive.

Predictability

Our configurable workflow queries consider common down-/upstream processes of legal work to keep your workflow moving and integrate legal at an early stage.

Focus

Use auto-fillable templates built into our configurable workflows, which automatically trigger downstream processes. This includes f.e. automatic submission to business registries via API integration.

Experience smooth collaboration with transparent responsibilities and well-designed forms collecting every, but only the necessary data, eliminating unnecessary inquiries and information overload.

Compliance

Ensure compliance with transparent responsibilities by preconfigured assignments and stay on track with checklists.

Central Point of Contact

Merge communication channels for a one-stop shop experience. Dashboards simplify workload monitoring and provide task oversight, reducing day-to-day volatility.

Ready to transform your legal department into a proactive, efficient powerhouse?
